- React, React Native, ASP.NET, Android Studio
- React Router 6, Java, C++, C#, SQL, Firebase
- HTML, CSS, JavaScript, Rest API, jQuery, Typescript, Tailwind CSS, Node js
- System Design, Npm, Git, CI/CD pipeline
- Fluent in English and Arabic

- Creative, Great problem solving
- Fast learner, Detailed
- Agile and efficient
- Excellent team working

EXPERIENCE

SPRING 2024 – SUMMER 2024
FRONT END DEVELOPMENT (REACT)

- Developed a React-based website for renting vans, featuring a multi-tab interface for seamless navigation
- Implemented user authentication to ensure secure access for users
- Integrated React Router to manage and navigate between different pages effectively
- Developed an Airbnb Experiences clone, replicating key features such as listing, booking, and reviewing experiences.
- Integrated external APIs to fetch and display real-time data, ensuring the apps remained up to date with the latest information

SUMMER 2023 – SPRING 2024

SOFTWARE ENGINEERING INTERNSHIP

- Was assigned to build a multiplatform system that included a mobile app, an MSSQL server database and a full-stack website running Node.js

SPRING OF 2022

MOBILE APP DEVELOPMENT

- Developed a social event making and browsing app with Android Studio java that uses google maps integration along with XML and Firebase

2022 - 2023

JAVA SCRIPT DEVELOPMENT

- Built many small projects using JavaScript, these include small websites and small web games I made using HTML, CSS, and JavaScript. I later used that experience on a full stack website that I have developed

FALL - WINTER OF 2022 – 2023

FULLSTACK WEBSITE BUILDING

- Created a full stack website for a cinema booking system and connected it to a database in which I used HTML, CSS, JavaScript, jQuery, ASP.NET(C#), SQL

ACTIVITIES

Most of the activities I do orbit around the realm of technology, sports and music. Video games are of big interest and have played a role in my career path.
